Cochrane Handbook for Systematic Reviews of Interventions Nov 24 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

'Mitch Albom sees the magical in the ordinary'
Cecelia Ahern _____ Maybe it was a grandparent, or a teacher or a colleague? Someone older, patient and wise, who understood you when you were young and searching, and gave you sound advice to help you make your way through it? For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded. Wouldn't you like to see that person again, ask the bigger questions that still haunt you? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying of ALS - or motor neurone disease - Mitch visited Morrie in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final 'class': lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world. Don't miss Mitch's uplifting new novel THE STRANGER IN THE LIFEBOAT, available to order now. _____

In his groundbreaking bestseller, Daniel Goleman argues that our view of human intelligence is far too narrow. It is not our IQ, but our emotional intelligence that plays a major role in thought, decision-making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness: all are qualities that mark people who excel, whose relationships flourish, who can navigate difficult conversations, who become stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us.

Diet for a New America 25th Anniversary

Edition Aug 02 2021 Originally published in 1987, *Diet for a New America* awakened the conscience of a nation with its startling examination of the food we buy and eat — and the moral, economic, and medical price we pay for it. Drawing a clear line connecting America's factory farm system with disease, animal cruelty, and ecological crises, Robbins makes perhaps the most eloquent argument for vegetarianism ever published. Robbins walked away from his family's business — the Baskin-Robbins ice cream empire — to pursue his dream of promoting a healthy society that practices "compassionate stewardship of a balanced ecosystem." In *Diet for a New America* he presents both a disturbing portrait of our current system and a vision for the future that will educate and empower readers to change.

Korean War Filmography Nov 12 2019 The Korean experience changed the way Americans viewed war. The lack of a clear-cut victory inspired filmmakers to try to make sense of fighting another country's civil war and risking American lives for an unpopular cause. This filmography details more than 90 English-language films. Each entry includes complete cast and credit listings, a plot synopsis, evaluation, review snippets, and notice of video availability. This book places each film in its historical context, assesses the essential

truthfulness of each film and evaluates its entertainment value, and discusses how—and why—Korean War films differ from other Hollywood war genres. Four appendices list the films by chronology; production company and studio; level of historical accuracy; and subject and theme. Additional appendices list films with incidental references to the Korean War; documentaries on the Korean War; and South Korean films about the war. Photographs, a bibliography, and an index are included.

Oil Painting Secrets From a Master May 19

2020 Some of the most popular art instruction books ever written have been based on student notes culled over the years from actual workshop sessions, with all their power and immediacy - and with practical, on-to-one contact between student and teacher. This is such a book. For more than two years, Linda Cateura has pursued teacher / artist David A. Leffel, notebook in hand, as he critiqued the work of students. Linda Cateura's succinct notes capture his insights, philosophy, painting hints, and general comments. Leffel's classic, painterly, twentieth-century old master style, much in the manner of Rembrandt or Chardin, affords ample illustration of the ideas expressed - through his many paintings, details, demonstrations, and diagrams, almost all in color. No matter what your level of ability, there is something here to apply to your own work, ideas that will cause you to rething your own ways of painting, hints to save you effort, or solutions to persistent painting problems.

Boundary-Layer Meteorology 25th Anniversary Volume, 1970-1995 Dec 14 2019

The journal *Boundary-Layer Meteorology* was started in 1970 and has become the premier vehicle for the publication of research papers in its field. Dr R.E. Munn served as Editor-in-Chief until recently. The special 25th Anniversary volume, on which this book is based, was compiled from review and other articles solicited and selected as a 'Festschrift' to honour Ted Munn's achievement as editor of the journal over that time. Articles by leading contributors to the field include reviews of field studies (Askervein, HEXOS, Cabauw) and their impacts; numerical modelling (large-eddy simulation of the surface layer, frontal structures); analyses and critical discussions (of the von Karman constant, bulk aerodynamic formulations, air-sea interaction, vegetation canopies); and reviews or previews of progress in our understanding of the atmospheric boundary layer, turbulence simulation, Lagrangian descriptions of turbulent diffusion and remote sensing of the boundary layer. The collection provides an excellent perspective on the state of the subject and where it is headed. It should provide fascinating and stimulating reading for researchers and students of boundary-layer meteorology and related areas.
