The construction of High Speed 2 - a railway estimated to cost £50 billion - will be one of the most expensive infrastructure projects ever undertaken in the UK. The Government has yet to make a convincing case for proceeding with the project. The Committee fully support investment in rail infrastructure and welcome the Government's commitment to it. But the project has to be developed against a background of financial restraint and it is not at all clear that HS2 represents the best, most cost effective solution to the problems it is intended to solve. The Government's two declared objectives for the project are to increase capacity on the railway to meet long-term demand and to rebalance the economy by stimulating growth in

the north of England. But the scale of the alleged capacity problem is unclear and the Government has not demonstrated that HS2 is the most effective way of achieving the desired rebalancing of the economy. On capacity, published statistics on current rail usage do not suggest that there is an overcrowding problem on long-distance trains, either now or in the near future. On stimulating growth, the Government has not considered whether this could be better achieved by investing in improving regional links between northern cities.

In the graveyard of economic ideology, dead ideas still stalk the land. The recent financial crisis laid bare many of the assumptions behind market liberalism--the theory that market-based solutions are always best, regardless of the problem. For decades, their advocates dominated mainstream economics, and their influence created a system where an unthinking faith in markets led many to view speculative investments as fundamentally safe. The crisis seemed to have killed off these ideas, but they still live on in the minds of many--members of the public, commentators, politicians, economists, and even those charged with cleaning up the mess. In *Zombie Economics*, John Quiggin explains how these dead ideas still walk among us--and why we must find a way to kill them once and for all if we are to avoid an even bigger financial crisis in the future. *Zombie Economics* takes the reader through the origins, consequences, and implosion of a system of ideas whose time has come and gone. These beliefs--that deregulation

had conquered the financial cycle, that markets were always the best judge of value, that policies designed to benefit the rich made everyone better off--brought us to the brink of disaster once before, and their persistent hold on many threatens to do so again. Because these ideas will never die unless there is an alternative, *Zombie Economics* also looks ahead at what could replace market liberalism, arguing that a simple return to traditional Keynesian economics and the politics of the welfare state will not be enough--either to kill dead ideas, or prevent future crises. In a new chapter, Quiggin brings the book up to date with a discussion of the re-emergence of pre-Keynesian ideas about austerity and balanced budgets as a response to recession. This concise book on Economics is specially published for the candidates of UGC-NET for Eligibility to JRF & Assistant Professor positions. The book is also equally useful for State Eligibility Test (SET) conducted by various States. The book presents all the relevant and important chapters and topics in a lucid and well-structured manner to study in a reader-friendly manner. All the study and practice material has been prepared by the learned subject-expert. Unit wise study material and ample amount of Solved MCQs are provided in exhaustive exercises with each unit in the book. Based on the latest pattern and syllabus, the book will prove useful for study, practice and during precious moments before the exam for reference and revision. Along with the Latest Study Material, numerous questions in Solved Previous Papers have been provided in the book. This makes the readers familiar with the exam pattern and the type of questions asked, and enables them to face the exam with confidence, successfully. This revision and practice book is a useful way for students to prepare effectively for their AS Economics exams. It covers every Unit from the AQA, Edexcel and OCR courses, with clear, concise explanations and examples that make the subject easy to understand. There are also practice questions and exam-style questions for every topic (with outline answers at the back), plus advice for getting top marks in the AS exams. This Teacher Guide provides answers and/or commentary to all of the

questions and exercises that appear in the textbook. It also includes additional exercises for each chapter and practice questions for the examination. The material is addressed to the student, and is designed to be photocopied and distributed after students have had the opportunity to work through the exercises and questions in the textbook themselves. Where appropriate, an explanation of the answer is provided as well.
