Radiobiology and Environmental Security Apr 09 2022 This volume – like the NATO Advanced Research Workshop on which it is based – addresses the fundamental science that contributes to our understanding of the potential risks from ecological terrorism, i.e. dirty bombs, atomic explosions, intentional release of radionuclides into water or air. Both effects on human health (DNA and systemic effects) and on ecosystems are detailed, with particular focus on environmentally relevant low-dose ranges. The state-of-the-art contributions to the book are authored by leading experts; they tackle the relevant questions from the perspectives of radiogenetics, radiobiology, radioecology, radiation epidemiology and risk assessment.

[Holland-Frei Cancer Medicine](#) Jan 18 2023 Holland-Frei Cancer Medicine, Ninth Edition, offers a balanced view of the most current knowledge of cancer science and clinical oncology practice. This all-new edition is the consummate reference source for medical oncologists, radiation oncologists, internists, surgical oncologists, and others who treat cancer patients. A translational perspective throughout, integrating cancer biology with cancer management providing an in-depth understanding of the disease. An emphasis on multidisciplinary, research-driven patient care to improve outcomes and optimal use of all appropriate therapies. Cutting-edge coverage of personalized cancer care, including molecular diagnostics and therapeutics. Concise, readable, clinically relevant text with algorithms, guidelines and insight into the use of both conventional and novel drugs. Includes free access to the Wiley Digital Edition providing search across the full reference list with web links, illustrations and photographs, and post-publication updates.
