This book describes how the implementation of variable rate launching in the context of a mixed-model assembly line with unlimited customization flexibility promotes customer-centric production. Variable rate launching (VRL) – as opposed to fixed rate launching (FRL) – eliminates idle time and utility work in mixed-model assembly lines. Even in the context of limitless customization, which runs the risk of concentrated peak workloads and possible longer assembly lines, a variable takt proves to be more economical than a fixed takt. On the technical side, a fixed takt requires both a healthy balance of process times and optimal scheduling to create feasible production schedules, as using average takt does not allow workers enough time to complete their tasks for more complex products. Because the variable takt relies on similar process times for a given product across the entire line for one product, and all products are given exactly the time they need for assembly, optimal series-sequencing and regular task rescheduling can be eliminated. This book is intended as a reference guide for experienced executives in manufacturing and academics teaching operational effectiveness for customer-centric production, and makes extensive references to AGCO Fendt's modern tractor line in Marktoberdorf, Germany. The book also offers application case studies from companies in related industries such as automotive, electronics, and machine tools. The book's key message is that variation should not be universally eliminated from manufacturing. As such, the book represents a counterpoint to the philosophy advocated by the Toyota Production System. This story is the culmination of a dream, a family and a journey. The dream continued over three consecutive nights during and after a flight to Australia. Steve and his wife had changed flights in Hong Kong where they purchased some Melatonin tablets to help avoid jet lag. Steve then slept from Hong Kong to Adelaide and the dream started. It continued over the next two nights whilst sleeping in the home of their great friend Marion just North of Adelaide. The family in the dream is Steve's real family as the dream had woven them all into the story. The other - French - family is pure dream. However Steve's wife is a doctor and they do both work in the NHS. Steve's brother did die too early at the age of 57. His Sister and her husband have raised money and built a school in Uganda and his younger brother is completing the conversion of a barn to the South West of Limoges. Steve has two children and one adorable grand daughter. His daughter has been looking at the geneology of the family and his son is a computer nerd whilst also being the family adventurer. The journey was to visit his brother near Limoges where he fell in love with the area and 'discovered' the Chateau that he had seen in the dream - smaller than he remembered but hey that's dreams for you.
