"Comparative International Accounting is intended to be a comprehensive and coherent text on international financial reporting. It is primarily designed for undergraduate and postgraduate courses in comparative and international aspects of

financial reporting. A proper understanding requires broad overviews (as in Part I), but these must be supported by detailed information on real countries and companies (as in Parts II to IV) and across-the-board comparisons of major topics (as in Parts V and VI). This book was first published in 1981. Until this present edition (the fourteenth), the book was jointly written by Christopher Nobes and Robert Parker. However, Bob Parker died shortly after the thirteen edition was published in 2016. This edition is dedicated to his memory; see obituaries in the 2016 volumes of Accounting and Business Research and Accounting History. Bob's last publication was a review of the development of the contents of this book (and therefore of the world of international accounting) over its thirteen editions from 1981 onwards. Readers can consult this in Volume 21 (Issue 4) of Accounting History"-- As the long-time #1 best-seller, Garrison has helped guide close to 3 million students through managerial accounting since it was first published. It identifies the three functions managers must perform within their organisations-plan operations, control activities, and make decisions-and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Garrison's Managerial Accounting is known for its relevance, accuracy, and clarity. It is also unique in that the authors write the most important supplements that accompany the book: solutions manual, test

bank, instructor's manual, and study guide - making them both of high quality and extremely consistent with the textbook. This is the latest edition of the world's best-selling textbook on bookkeeping and accounting. It contains a large number of questions and answers and worked examples. The approach used by Hoyle, Schaefer, and Douppnik allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this Advanced Accounting textbook, students gain a well-balanced appreciation of the profession. As the 14th edition delves into the many aspects of accounting, it often focuses on past controversies and present resolutions. The Hoyle/Schaefer/Douppnik textbook shows the development of financial reporting as a product of intense and considered debate that continues today and into the future. Students easily comprehend concepts because of the textbook's highly praised conversational tone along with the engaging, lively, and consistent writing style, all of which has contributed to making this the market-leading textbook for Advanced Accounting. The SmartBook 2.0 adaptive reading tool and algorithmic problems have been included in the new edition, along with the latest accounting standards.
