*Islamic Empires* Dec 05 2021 'Outstanding, illuminating, compelling ... a riveting read' Peter Frankopan, Sunday Times  
Islamic civilization was once the envy of the world. From a succession of glittering, cosmopolitan capitals, Islamic empires lorded it over the Middle East, North Africa, Central Asia and swathes of the Indian subcontinent. For centuries the caliphate was both ascendant on the battlefield and triumphant in the battle of ideas, its cities unrivalled powerhouses of artistic grandeur, commercial power, spiritual sanctity and forward-looking thinking. *Islamic Empires* is a history of this rich and diverse civilization told through its greatest cities over fifteen centuries, from the beginnings of Islam in Mecca in the seventh century to the astonishing rise of Doha in the twenty-first. It dwells on the most remarkable dynasties ever to lead the Muslim world - the Abbasids of Baghdad, the Umayyads of Damascus and Cordoba, the Merinids of Fez, the Ottomans of Istanbul, the Mughals of India and the Safavids of Isfahan - and some of the most charismatic leaders in Muslim history, from Saladin in Cairo and mighty Tamerlane of Samarkand to the poet-prince Babur in his mountain kingdom of Kabul and the irrepressible Maktoum dynasty of Dubai. It focuses on these fifteen cities at some of the defining moments in Islamic history: from the Prophet Mohammed receiving his divine revelations in Mecca and the First Crusade of 1099 to the conquest of Constantinople in 1453 and the phenomenal creation of the merchant republic of Beirut in the nineteenth century.

The Broken Spears 2007 Revised Edition May 18 2020 For  
hundreds of years, the history of the conquest of Mexico and the

defeat of the Aztecs has been told in the words of the Spanish victors. Miguel León-Portilla has long been at the forefront of expanding that history to include the voices of indigenous peoples. In this new and updated edition of his classic *The Broken Spears*, León-Portilla has included accounts from native Aztec descendants across the centuries. These texts bear witness to the extraordinary vitality of an oral tradition that preserves the viewpoints of the vanquished instead of the victors. León-Portilla's new Postscript reflects upon the critical importance of these unexpected historical accounts.

**Egyptomaniacs** Jul 20 2020 The Greek historian Hecataeus of Abdera declared during the 4th century BCE that the Egyptian civilization was unsurpassed in the arts and in good governance, surpassing even that of the Greeks. During the Renaissance, several ecclesiastical nobles, including the Borgia Pope Alexander VI claimed their descent from the Egyptian god Osiris. In the 1920s, the discovery of Tutankhamun's tomb in the Valley of the Kings prompted one of the first true media frenzies in history. For thousands of years, the Pharaonic culture has been a source of almost endless fascination and obsession. But to what extent is the popular view of ancient Egypt at all accurate? In *Egyptomaniacs: How We Became Obsessed With Ancient Egypt*, Egyptologist Dr Nicky Nielsen examines the popular view of Egypt as an exotic, esoteric, mystical culture obsessed with death and overflowing with mummies and pyramids. The book traces our obsession with ancient Egypt throughout history and methodically investigates, explains and strips away some of the most popular misconceptions about the Pharaohs and their civilization

Lost Enlightenment Jun 11 2022 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly

all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

**Civilization** Oct 11 2019 "Civilization" is the definitive history of Western civilization's rise to global dominance--and the "killer applications" that made this improbable ascent possible: competition, science, the rule of law, consumerism, modern medicine, and the work ethic.

**Conquests and Cultures** Mar 08 2022 This book is the culmination of 15 years of research and travels that have taken the author completely around the world twice, as well as on other travels in the Mediterranean, the Baltic, and around the Pacific rim. Its purpose has been to try to understand the role of cultural differences within nations and between nations, today and over centuries of history, in shaping the economic and social fates of peoples and of whole civilizations. Focusing on four major cultural areas(that of the British, the Africans (including the African diaspora), the Slavs of Eastern Europe, and the indigenous peoples of the Western Hemisphere -- Conquests and Cultures reveals patterns that encompass not only these peoples but others and help explain the role of cultural evolution in economic, social, and political development.

The Rise and Fall of Ancient Egypt Nov 04 2021 This is a story studded with extraordinary achievements and historic moments, from the building of the pyramids and the conquest of Nubia, through Akhenaten's religious revolution, the power and beauty of Nefertiti, the glory of Tutankhamun's burial chamber, and the ruthlessness of Ramesses, to Alexander the Great's invasion, and Cleopatra's fatal entanglement with Rome. As the world's first nation-state, the history of Ancient Egypt is above all the story of the attempt to unite a disparate realm and defend it against hostile forces from within and without. Combining grand narrative sweep with detailed knowledge of hieroglyphs and the iconography of power, Toby Wilkinson reveals Ancient Egypt in all its complexity.

**Pax Romana** Nov 23 2020 The Pax Romana is famous for having provided a remarkable period of peace and stability, rarely seen before or since. Yet the Romans were first and foremost conquerors, imperialists who took by force a vast empire stretching from the Euphrates in the east to the Atlantic coast in the west. Their peace meant Roman victory and was brought about by strength and dominance rather than co-existence with neighbours. The Romans were aggressive and ruthless, and during the creation of their empire millions died or were enslaved. But the Pax Romana was real, not merely the boast of emperors, and some of the regions in the Empire have never again lived for so many generations free from major wars. So what exactly was the Pax Romana and what did it mean for the people who found themselves brought under Roman rule?

Acclaimed historian Adrian Goldsworthy tells the story of the creation of the Empire, revealing how and why the Romans came to control so much of the world and asking whether the favourable image of the Roman peace is a true one. He chronicles the many rebellions by the conquered, and describes why these broke out and why most failed. At the same time, he explains that hostility was only one reaction to the arrival of Rome, and from the start there was alliance, collaboration and even enthusiasm for joining the invaders, all of which increased as resistance movements faded away. A ground-breaking and comprehensive history of the Roman Peace, Pax Romana takes the reader on a journey from the bloody conquests of an aggressive Republic through the age of Caesar and Augustus to the golden age of peace and prosperity under diligent emperors like Marcus Aurelius, offering a balanced and nuanced reappraisal of life in the Roman Empire.

Robert Fisk on Afghanistan Jun 30 2021 It began on a surge of international consensus, following the 9/11 terrorist atrocities. Thirteen years later, the US-led coalition's war in Afghanistan came to a quiet close. Britain and America are still counting the cost. Throughout that time, one journalist above all others has reported on the conflict with unfailing insight, perspective and courage. This is Robert Fisk at his best.

**A Line in the Sand** Feb 24 2021 A fascinating insight into the untold story of how British-French rivalry drew the battle-lines of the modern Middle East. In 1916, in the middle of the First World War, two men secretly agreed to divide the Middle East between them. Sir Mark Sykes was a visionary politician; François Georges-Picot a diplomat with a grudge. They drew a line in the sand from the Mediterranean to the Persian frontier, and together remade the map of the Middle East, with Britain's

'mandates' of Palestine, Transjordan and Iraq, and France's in Lebanon and Syria. Over the next thirty years a sordid tale of violence and clandestine political manoeuvring unfolded, told here through a stellar cast of politicians, diplomats, spies and soldiers, including T. E. Lawrence, Winston Churchill and Charles de Gaulle. Using declassified papers from the British and French archives, James Barr vividly depicts the covert, deadly war of intrigue and espionage between Britain and France to rule the Middle East, and reveals the shocking way in which the French finally got their revenge. 'The very grubby coalface of foreign policy ... I found the entire book most horribly addictive' Independent 'One of the unexpected responses to reading this masterful study is amazement at the efforts the British and French each put into undermining the other' The Spectator

The Shadow of the Great Game May 10 2022 The untold story of India's Partition. The partition of India in 1947 was the only way to contain intractable religious differences as the subcontinent moved towards independence - or so the story goes. But this dramatic new history reveals previously overlooked links between British strategic interests - in the oil wells of the Middle East and maintaining access to its Indian Ocean territories - and partition. Narendra Singh Sarela reveals here how the Great Game against the Soviet Union cast a long

shadow. The top-secret documentary evidence unearthed by the author sheds new light on several prominent figures, including Gandhi, Jinnah, Mountbatten, Churchill, Attlee, Wavell and Nerhu. This radical reassessment of one of the key events in British colonial history is important in itself, but its claim that many of the roots of Islamic terrorism sweeping the world today lie in the partition of India has much wider implications.

**The Conquest of Assyria** Dec 25 2020 The Conquest of Assyria tells what must surely be one of the most romantic tales of archaeological endeavour. This volume records the dramatic finds, the decipherment of the cuneiform system of writing and the rediscovery of a lost civilisation.

He is considered one of the founders of analytic philosophy along with his predecessor Gottlob Frege, colleague G. E. Moore, and his protégé Ludwig Wittgenstein. He is widely held to be one of the 20th century's premier logicians. With A. N.

Whitehead he wrote *Principia Mathematica*, an attempt to create a logical basis for mathematics. His philosophical essay "On Denoting" has been considered a "paradigm of philosophy". His work has had a considerable influence on logic, mathematics, set theory, linguistics, artificial intelligence, cognitive science, and philosophy, especially the philosophy of language, epistemology, and metaphysics.

The Norman Conquest Mar 16 2020 A riveting and authoritative history of the single most important event in English history: The Norman Conquest. An upstart French duke who sets out to conquer the most powerful and unified kingdom in Christendom. An invasion force on a scale not seen since the days of the Romans. One of the bloodiest and most decisive battles ever fought. This new history explains why the Norman Conquest was the most significant cultural and military episode in English history. Assessing the original evidence at every turn, Marc Morris goes beyond the familiar outline to explain why England was at once so powerful and yet so vulnerable to William the Conqueror's attack. **Histories of Trade as Histories of Civilisation** Jan 26 2021

This edited collection explores the histories of trade, a peculiar literary genre that emerged in the context of the historiographical and cultural changes promoted by the *histoire philosophique* movement. It marked a discontinuity with erudition and antiquarianism, and interacted critically with universal history. By comparing and linking the histories of individual peoples within a common historical process, this genre enriched the reflection on civilisation that emerged during the long eighteenth century. Those who looked to the past wanted to understand the political constitutions and manners most appropriate to commerce, and grasp the recurring mechanisms underlying economic development. In this sense, histories of trade constituted a declination of eighteenth-century political economy, and thus became an invaluable analytical and practical tool for a galaxy of academic scholars, journalists, lawyers, administrators, diplomats and government ministers

whose ambition was to reform the political, social and economic structure of their nations. Moreover, thanks to these investigations, a lucid awareness of historical temporality and, more particularly, the irrepressible precariousness of economic hegemonies, developed. However, as a field of tension in which multiple and even divergent intellectual sensibilities met, this literary genre also found space for critical assessments that focused on the ambivalence and dangers of commercial civilisation. Examining the complex relationship between the production of wealth and civilisation, this book provides unique insights for scholars of political economy, intellectual history and economic history.

**Syria** Oct 03 2021 This remarkable anthology chronicles more than three years of spiralling violence and despair in Syria: atrocity heaped upon atrocity, misery upon misery, and all - so far - to no avail. As for the living, close to 3 million refugees have fled Syria, with millions more internally displaced. How did we come to this? There is no better way to answer this question than to revisit The Independent's published accounts of the unfolding tragedy. Spearheaded by peerless and profoundly experienced correspondents such as Patrick Cockburn, Robert Fisk, Kim Sengupta, our coverage has led the world in its fearlessness and insight. Syria's tragedy is not yet over.
