For Mechanical Engineering Students of Indian Universities. It is also available in 4 Individual Parts. This book extensive pruning of the solved Examples in the text. Majority of the old examples have been replaced by questions set in the latest examination papers of different engineering colleges and technical institutions. In this book we have included more examples, tutorial problems and objective test questions in almost all the chapters. The chapter on Optoelectronic Devices has been expanded to include more application examples in the area of optical fibre networks. The chapter on Regulated Power Supply carries more detailed study of fixed positive-Fixed negative and adjustable-linear IC voltage regulators as well as switching voltage regulator. The topic on OP-AMPs has been separated from the chapter on integrated Circuits. A new chapter is prepared on OP-AMPs and its Applications. The Chapter on OP-AMPs and its Applications includes OP-AMP based Oscillator circuits, active filters etc. A multicolor edition of Vol. II of A Textbook of Electrical Technology to keep pace with the ever-increasing scope of essential and modern technical information, the syllabi are frequently revised. This often result into compressing established facts to accommodate recent information in the syllabi. Fields of power-electronics and industrial power-conditioners have grown

considerably resulting into changed priority of topics related to electrical machines. Switched reluctance-motors tend to threaten the most popular squirrel-cage induction motors due to their increased ruggedness, better performance including controllability and equal ease with which they suit rotary as well as linear-motion-applications. A young British officer deserted during the First Afghan War (1839-42) and went to ground in the wilds of Tehri-Garhwal. Frederick 'Pahari'Wilson changed the face of the region forever and became a Himalayan legend. He played a daring role in the Great Game, was witness to the Anglo-Sikh War of 1845 - when the British nearly lost India - and became a pioneering force in the great Indian Railways adventure. Capturing the humour of the petty world of officers'clubs in Meerut, Mussoorie

and Shimla, the chill of stiff winds on the high passes into Tibet, and the hardships of life in the remote valleys of Garhwal, The Raja of Harsil is a thrilling account of that tumultuous and exciting period. Driven by personal ambition, Frederick Wilson introduced commercial timbering to the Himalayas and became India's first timber magnate. An avid hunter, ornithologist and botanist, he settled at Harsil, near the source of the Ganges, and shared the lives and destinies of the Garhwali people. He acquired enormous wealth - becoming the richest man in northern India - and famous as the 'raja' of Harsil before falling into disfavour - termed a pariah for plundering Garhwal of its wildlife and natural resources. An intriguing tale of grit, courage and adventure, The Raja of Bourbon is a well-researched historical account that traces the 'swashbuckling narrative' of Jean de Bourbon, a nephew of Henry IV, the first Bourbon French king. In the mid-sixteenth century Jean embarks on his first journey from France to survive attempts to assassinate him. Alone in the wide world, he is kidnapped by pirates and sold at an Egyptian slave market. From Egypt to Ethiopia, his journey is full of adventures, each more incredible than the other. In 1560, Jean finally arrives at the court of the Mughal emperor Akbar, ushering in a long trail of Bourbons in India. Balthazar de Bourbon, Jean's sole descendant in India, still stays in Bhopal, proud of his legendary ancestor and family history. "Basic Electrical Engineering" is written exclusively for B. Tech.
