The Exposed City Oct 24 2020 There is a vast amount of information about a city which is invisible to the human eye – crime levels, transportation patterns, cell phone use and air quality to name just a few. If a city was able to be defined by these characteristics, what form would it take? How could it be mapped? Nadia Amoroso tackles these questions by taking statistical urban data and exploring how they could be transformed into innovative new maps. The "unseen" elements of the city are examined in groundbreaking images throughout the book, which are complemented by interviews with Winy Maas and James Corner, comments by Richard Saul Wurman, and sections by the SENSEable City Lab group and Mark Aubin, co-founder of Google Earth.

The Invisible City Jan 27 2021 The search for the city of Kobar takes a mysterious and deadly turn...Excerpt "Confound you," said Langley in a hoarse whisper that came with effort through swollen lips, blue-black with thirst. "You've gulped about twice

your share of the last water in the Lob-nor Desert." He shook the canteen which Furnham had just returned to him, and listened with a savage frown to the ominously light gurgling of its contents. The two surviving members of the Furnham Archaeological Expedition eyed each other with new-born but rapidly growing disfavor. Furnham, the leader, flushed with dark anger beneath his coat of deepening dust and sunburn. The accusation was unjust, for he had merely moistened his parched tongue from Langley's canteen. His own canteen, which he had shared equally with his companion, was now empty. Up to that moment the two men had been the best of friends. Their months of association in a hopeless search for the ruins of the semi-fabulous city of Kobar had given them abundant reason to respect each other. Their quarrel sprang from nothing else than the mental distortion and morbidity of sheer exhaustion, and the strain of a desperate predicament. Langley, at times, was even growing a trifle light-headed after their long ordeal of wandering on foot through a land without wells, beneath a sun whose flames poured down upon them like molten lead. "We ought to reach the Tarim River pretty soon," said Furnham stiffly, ignoring the charge and repressing a desire to announce in mordant terms his unfavorable opinion of Langley. "If we don't, I guess it will be your fault," the other snapped. "There's been a jinx on this expedition from the beginning; and I shouldn't wonder if the jinx were you. It was your idea to hunt for Kobar anyway. I've never believed there was any such place." Furnham glowered at his companion, too near the breaking point himself to make due allowance for Langley's nerve-wrought condition, and then turned away, refusing to reply. The two plodded on, ignoring each other with sullen

ostentatiousness. The expedition, consisting of five Americans in the employ of a New York museum, had started from Khotan two months before to investigate the archaeological remains of Eastern Turkestan. Ill-luck had dogged them continually; and the ruins of Kobar, their main objective, said to have been built by the ancient Uighurs, had eluded them like a mirage. They found other ruins, had exhumed a few Greek and Byzantine coins, and a few broken Buddhas, but nothing of much novelty or importance, from a museum viewpoint.

The Invisible City May 11 2022 In this collection of thirty-four sketches, the author captures the extraordinary range of people, experiences, places and feelings that is New York City -- the city behind the glamorous facade of Manhattan, inhabited by people who remember when this was "a great big wonderful town and they were young in its streets." These sketches, many based on actual incidents, take as their subject the "smaller dramas" of mankind, the chance encounters and random episodes that inform one's life; often twisting suddenly, surprisingly, at the end, they convey strong feelings in little space. Using all of New York as his broad canvas, Pete Hamill recreates the baffling array of human emotions, from sadness and nostalgia to home and love, with affection, grace and wry understanding.

Kinshasa Jan 19 2023 Reading African cities into contemporary theory—reprint of a richly illustrated reference work In their internationally acclaimed publication *Kinshasa: Tales of the Invisible City*, anthropologist Filip De Boeck and photographer Marie-Françoise Plissart provide a history not only of the physical and visible urban reality that Kinshasa presents today, but also of a second, invisible city as it exists in the mind and imagination of its inhabitants. They bring to light a mirroring reality lurking underneath the surface of the visible world and explore the constant transactions that take place between these two levels in Kinshasa's urban scape. With the exhibition that accompanied the release of their Kinshasa book, the authors won a Golden Lion at the 11th International Architecture Biennale in Venice, 2004. This beautifully illustrated publication is now again made available. Based on longstanding field research, it provides insight into local social and cultural imaginaries, and thus in the imaginative ways in which local urban subjects continue to make sense of their worlds and invent cultural strategies to cope with the breakdown of urban infrastructure.

The Invisible City Mar 09 2022 These five studies represent a detailed view of monetary production, forms of exchange and processes of state formation. They uncover the infrastructures of a common life that, the author argues, stretches across Asia and Europe and underlies all regional and local developments.

Invisible City Aug 22 2020 Invisible City analyzes conventual architecture in terms of the politics of sight, "the optics of power", the relationship between flesh and stone. It uncovers the connections between the bodies of the nuns and the walls that housed them, presenting the architecture of female convents as a metaphor for the body of the aristocratic female virgin nun.

"Invisible Cities" and the Urban Imagination Nov 12 2019 In 1972, Italo Calvino published Invisible Cities, a literary book that masterfully combines philosophy and poetry, rigid structure and free play, theoretical insight and glittering prose. The text is an extended meditation on urban life, and it continues to resonate not

only among literary scholars, but among social scientists, architects, and urban planners as well. To commemorate the 50th anniversary of *Invisible Cities*, this collection of essays serves as both an appreciation and a critical engagement. Drawing from a wide array of disciplinary perspectives and geographical contexts, this volume grapples with the theoretical, pedagogical, and political legacies of Calvino's work. Each chapter approaches *Invisible Cities* not only as a novel but as a work of evocative ethnography, place-writing, and urban theory. Fifty years on, what can Calvino's dreamlike text offer to scholars and practitioners interested in actually existing urban life?

Plato's Invisible Cities May 31 2021 This book offers an original and detailed reading of Plato's Republic, one of the most influential philosophical works in the emergence of Western philosophy. The author discusses the Republic in terms of discursive events and political acts. Plato's act is placed in the

context of a politico-discursive crisis in Athens at the end of the fifth and the beginning of the fourth century B.C that gave rise to the dialogue's primary question, that of justice. The originality of Dr. Ophir lies in the way he reconstructs the Republic's different spatial settings - utopian, mythical, dramatic and discursive - using them as the main thread of his interpretation. Against the background of Plato's critique of the organisation of civic-space in the Greek polis, the author relates the spatial settings in the Plato text to each other. This provides a basis for a re-examination of the relationship between philosophy and politics, which Plato's work advocates, and which it actually enacted.

The Invisible City Nov 17 2022 The Invisible City explores urban spaces from the perspective of a traveller, writer, and

creator of theatre to illuminate how cities offer travellers and residents theatrical visions while also remaining mostly invisible, beyond the limits of attention. The book explores the city as both stage and content in three parts. Firstly, it follows in pattern Italo Calvino's novel *Invisible Cities*, wherein Marco Polo describes cities to the Mongol emperor Kublai Khan, to produce a constellation of vignettes recalling individual cities through travel writing and engagement with artworks. Secondly, Gillette traces the Teatro Potlach group and its ongoing immersive, site-specific performance project *Invisible Cities*, which has staged performances in dozens of cities across Europe and the Americas. The final part of the book offers useful exercises for artists and travellers interested in researching their own invisible cities. Written for practitioners, travellers, students, and thinkers interested in the city as site and source of performance, *The Invisible City* mixes travelogue with criticism and cleverly combines philosophical meditations with theatrical pedagogy.

The City Beneath Feb 14 2020 A sweeping history of Los Angeles told through the lens of the many marginalized groups—from hobos to taggers—that have used the city's walls as a channel for communication. Graffiti written in storm drain tunnels, on neighborhood walls, and under bridges tells an underground and, until now, untold history of Los Angeles. Drawing on extensive research within the city's urban landscape, Susan A. Phillips traces the hidden language of marginalized groups over the past century—from the early twentieth-century markings of hobos, soldiers, and Japanese internees to the later inscriptions of surfers, cholos, and punks. Whether describing daredevil kids, bored workers, or clandestine lovers, Phillips

profiles the experiences of people who remain underrepresented in conventional histories, revealing the powerful role of graffiti as a venue for cultural expression. Graffiti aficionados might be surprised to learn that the earliest documented graffiti bubble letters appear not in 1970s New York but in 1920s Los Angeles. Or that the negative letterforms first carved at the turn of the century are still spray painted on walls today. With discussions of characters like Leon Ray Livingston (a.k.a. “A-No. 1”), credited with consolidating the entire system of hobo communication in the 1910s, and Kathy Zuckerman, better known as the surf icon “Gidget,” this lavishly illustrated book tells stories of small moments that collectively build into broad statements about power, memory, landscape, and history itself.

Becoming Surrey Jul 01 2021 *Becoming Surrey: Journey Through the Invisible City* is an exploration of an urban environment, its point of view influenced by W.G. Sebald's *Austerlitz*, further informed by the writings of Lewis Mumford's *The City in History* and E.V. Walter's *Placeways* that together provide theoretical perspectives to my *Journey Through the City of Surrey*, where the sense of Place is defined by unique historical legacies and topistic qualities. *Becoming Surrey* as a 'Journey' uses photographs and reflections to identify and confront the 'topistic reality' of 'modernity' evident in the built world of Surrey in order to describe and construct an atlas of 'The Invisible City'. My intention is to answer Walter's riddle of "What is this Place?" *Becoming Surrey* consists of two intersecting paths by which to understand Surrey as a Place. The written component uses selected historical references, conversations and experiences that occurred in the course of academic and artistic research. The photographs continue my artistic practice that relates to a tradition of street photography that explores the landscape and pathways in order to expand the spirit of the written narrative. The reader and viewer are invited to synthesize both word and image into a consciousness of the complexities of experiencing the City of Surrey as a Place, yet this word / image dialogue entertains topistic ambiguities that suggests neither is capable of standing by itself nor does it offer an immutable representation of the Invisible City.

Invisible City Apr 29 2021 A legendary figure in the realms of public policy and academia, John Gilderbloom is one of the foremost urban-planning researchers of our time, producing

groundbreaking studies on housing markets, design, location, regulation, financing, and community building. Now, in *Invisible City*, he turns his eye to fundamental questions regarding housing for the elderly, the disabled, and the poor. Why is it that some locales can offer affordable, accessible, and attractive housing, while the large majority of cities fail to do so? *Invisible City* calls for a brave new housing paradigm that makes the needs of marginalized populations visible to policy makers. Drawing on fascinating case studies in Houston, Louisville, and New Orleans, and analyzing census information as well as policy reports, Gilderbloom offers a comprehensive, engaging, and optimistic theory of how housing can be remade with a progressive vision. While many contemporary urban scholars have failed to capture the dynamics of what is happening in our cities, Gilderbloom presents a new vision of shelter as a force that shapes all residents.

Invisible City Jan 07 2022 For a decade, Ken Schles watched the passing of time from his Lower East Side neighbourhood. His camera fixed the instances of his observations, and these moments became the foundation of his invisible city. Friends and architecture come under the scrutiny of his lens and, when sorted and viewed in the pages of this book, a remarkable achievement of personal vision emerges. Twenty-five years later, 'Invisible city' still has the ability to transfix the viewer. Documenting his life in New York City's East Village during its heyday in the tumultuous 1980s, Schles captured its look and attitude in delirious and dark verité. Long out of print, this 'missing link' in the history of the photographic book is now once again made

available. Using scans from the original negatives and Steidl's five plate technique to bring out nuance and detail never seen before in print, this masterful edition transcends the original, bringing this underground cult classic into the 21st century for a new generation to discover.

Invisible Cities Feb 20 2023 'A subtle and beautiful meditation' Sunday Times In *Invisible Cities* Marco Polo conjures up cities of magical times for his host, the Chinese ruler Kublai Khan, but gradually it becomes clear that he is actually describing one city: Venice. As Gore Vidal wrote 'Of all tasks, describing the contents of a book is the most difficult and in the case of a marvellous

invention like Invisible Cities, perfectly irrelevant.'
