*Piano Notes* Mar 08 2022 Charles Rosen is one of the world's most talented pianists -- and one of music's most astute commentators. Known as a performer of Bach, Beethoven, Stravinsky, and Elliott Carter, he has also written highly acclaimed criticism for sophisticated students and professionals. In *Piano Notes*, he writes for a broader audience about an old friend -- the piano itself. Drawing upon a lifetime of wisdom and the accumulated lore of many great performers of the past, Rosen shows why the instrument demands such a stark combination of mental and physical prowess. Readers will gather

many little-known insights -- from how pianists vary their posture, to how splicings and microphone placements can ruin recordings, to how the history of composition was dominated by the piano for two centuries. Stories of many great musicians abound. Rosen reveals Nadia Boulanger's favorite way to avoid commenting on the performances of her friends ("You know what I think," spoken with utmost earnestness), why Glenn Gould's recordings suffer from "double-strike" touches, and how even Vladimir Horowitz became enamored of splicing multiple performances into a single recording. Rosen's explanation of the piano's physical pleasures, demands, and discontents will delight and instruct anyone who has ever sat at a keyboard, as well as everyone who loves to listen to the instrument. In the end, he strikes a contemplative note. Western music was built around the piano from the classical era until recently, and for a good part of that time the instrument was an essential acquisition for every middle-class household. Music making was part of the fabric of social life. Yet those days have ended. Fewer people learn the instrument today. The rise of recorded music has homogenized performance styles and greatly reduced the frequency of public concerts. Music will undoubtedly survive, but will the supremely physical experience of playing the piano ever be the same?

*The Tender Cut* Oct 15 2022 Choice's Outstanding Academic Title list for 2013 2013 Honorable Mention for the Distinguished Book Award presented by the Midwest Sociological Society Honorable Mention for the Charles H. Cooley Award for Outstanding Book from the Society for the Study of Symbolic Interaction Cutting, burning, branding, and bone-breaking are all types of self-injury, or the deliberate, non-suicidal destruction of one's own body tissue, a practice that emerged from obscurity in the 1990s

and spread dramatically as a typical behavior among adolescents. Long considered a suicidal gesture, *The Tender Cut* argues instead that self-injury is often a coping mechanism, a form of teenage angst, an expression of group membership, and a type of rebellion, converting unbearable emotional pain into manageable physical pain. Based on the largest, qualitative, non-clinical population of self-injurers ever gathered, noted ethnographers Patricia and Peter Adler draw on 150 interviews with self-injurers from all over the world, along with 30,000-40,000 internet posts in chat rooms and communiqués. Their 10-year longitudinal research follows the practice of self-injury from its early days when people engaged in it alone and did not know others, to the present, where a subculture has formed via cyberspace that shares similar norms, values, lore, vocabulary, and interests. An important portrait of a troubling behavior, *The Tender Cut* illuminates the meaning of self-injury in the 21st century, its effects on current and former users, and its future as a practice for self-discovery or a cry for help.

*Hidden World* May 10 2022 Magic appears in moments we never thought we'd imagine. No amount of planning can recreate moments we experience so deeply - all thoughts are momentarily suspended. However, many are waking up from the epidemic of chronic thinking. We are realising the human soul is not simply an evolutionary experiment in survival. We see that we are here to share our gifts. Written in a way that speaks to the subconscious, Dr. Kaushik Ram's mix of observations and fictional stories brings poetry and magic into our modern reality. Learn what lies beyond the conventional approaches to mind and body and discover the dreams only you can imagine. It is then we realise... we have just begun.

*Demon Fish* Aug 21 2020 A group of traders huddles around a pile of dried shark fins on a gleaming white floor in Hong Kong. A Papua New Guinean elder shoves off in his hand-carved canoe, ready to summon a shark with ancient magic. A scientist finds a rare shark in Indonesia and forges a deal with villagers so it and other species can survive. In this eye-opening adventure that spans the globe, Juliet Eilperin investigates the fascinating ways different individuals and cultures relate to

the ocean's top predator. Along the way, she reminds us why, after millions of years, sharks remain among nature's most awe-inspiring creatures. From Belize to South Africa, from Shanghai to Bimini, we see that sharks are still the object of an obsession that may eventually lead to their extinction. This is why movie stars and professional athletes go shark hunting in Miami and why shark's fin soup remains a coveted status symbol in China. Yet we also see glimpses of how people and sharks can exist alongside one another: surfers tolerating their presence off Cape Town and ecotourists swimming with sharks that locals in the Yucatán no longer have to hunt. With a reporter's instinct for a good story and a scientist's curiosity, Eilperin offers us an up-close understanding of these extraordinary, mysterious creatures in the most entertaining and illuminating shark encounter you're likely to find outside a steel cage.

*The House of Secrets May 30 2021* The first inside look at the experiences of women who visit traditional mikvehs—ritual baths used to achieve purity. For Orthodox Jews, immersion in the mikveh—a ritual cleansing bath for women based on purity laws—is the cornerstone of family life. All Orthodox women must immerse in the mikveh before marriage, and Ashkenazi women must immerse every month after their menstrual cycle before sexual relations with their husbands may resume. But while the mikveh has been a tool for the exclusion of women, it has also, surprisingly,

become an instrument of women's power—a place men cannot enter and thus cannot control. Roused by her own experiences of immersion, for eleven years Varda Polak-Sahm patiently observed and interviewed Jewish women using the mikveh, gaining unprecedented access to the entirely hidden feminine culture and sensual atmosphere within traditional mikvehs. The result is a richly nuanced, uncensored look at an experience that is for some holy and for others coercive. The House of Secrets gives voice to women from all branches of Judaism as they open up about what the mikveh means to them; how it fits in with their attitudes toward religion; its effect on their marriages and families as well as on their sexual, physical, and spiritual self-perception and on their relationship with God. Already widely praised in Israel, this English translation provides a firsthand account of the power of ritual immersion for the growing number of American Jews interested in reclaiming this practice.

The insides of these and dozens of other objects are revealed in this photographic exploration of the stuff all around us, exposed and explained. With the help of a high-pressure waterjet cutter able to slice through 4 inches of steel plate, designer and fabricator Mike Warren (creator of the popular Cut in Half YouTube channel) cuts into everything from boom boxes to boxing

*Diamond Street Jun 30 2021* Hatton Garden is one of the most secret streets in England, home for two centuries to a deeply private working community of diamond and jewellery dealers. Intimately connected to the area both personally (her family run a jewellery business there) and professionally (as an artist archivist of London's streets), Rachel Lichtenstein is uniquely placed to explore the extraordinary history of this mysterious quarter, with its ancient burial sites, diamond workshops, underground vaults, subterranean rivers, monastic dynasties and forgotten palaces. Moving beyond the street itself into parts of Clerkenwell, Holborn and Farringdon, Rachel follows the ancient perimeter of the original Hatton Garden estate, which once bordered the lost River Fleet. Guided on her walks by archaeologists, sewer flushers, artists, goldsmiths, geologists and visionaries of the city such as Iain Sinclair, she crosses the same territory repeatedly, gathering new layers of the story with each journey. The result is a brilliantly immersive and multi-layered portrait; both a documentary and a secret history of a vanishing world.

*Unseen Lives Dec 13 2019* '...a fully grown man utterly broken by what he had experienced, physically and mentally exhausted with physical evidence showing the overt signs of the abuse he had been through.' This is how Kate Garbers met Riso, a man who had been trafficked and in forced labour for months, with no way

out. Modern slavery is far closer than we think. Yet it is largely unseen and unknown to most of us - a crime against humanity hidden in plain sight. In this revealing exposé, Kate Garbers shares moving stories of survivors she has met and shares insights she has gained through over a decade of anti-slavery work. Survivor stories are complemented by a forensic account of how modern slavery works and the many forms it can take - from forced labour to organ harvesting - and how it is enabled to continue by our current laws and systems. *Unseen Lives* also provides a vision of hope for those looking to challenge and dismantle modern slavery, laying out what changes we need to make as individuals and as a society in order to effectively tackle modern slavery and improve the support of survivors.

*Exploring Britain's Hidden World Sep 02 2021* Britain's shallow seas are a mysterious domain. They remain largely unseen and unexplored except by marine scientists and divers, who have been documenting their wondrous discoveries over many years. Now, a wealth of information about what lives on and in the seabed has been brought together in one sumptuously illustrated volume. Keith Hiscock describes the incredible variety of marine life that exists around Great Britain, providing a foundation of knowledge for those interested in the natural history of the shallow seabed. He explains how findings are gathered and organised, as well as showing what is out there and how it works. Fascinating, beautiful and often fragile, the habitats and marine life described are essential to the health and productivity of our oceans. Without an adequate, shared understanding of what and where they are, how can we identify and protect them? *Exploring Britain's Hidden World* is the culmination of 50 years of research by the author to better understand where different subtidal seabed habitats occur and how their associated marine life has come to exist. That quest draws on a rich vein of knowledge obtained by many naturalists, scientists and divers who, for almost 200 years, have described seabed communities and sought to understand their structure and function. Using a minimum of technical terminology, Keith Hiscock combines his interests in marine biology, diving and photography to inform, inspire, and leave a vivid and lasting impression of the marine habitats and species around Britain. He hopes this book will provide new insights, much pleasure, and perhaps some surprises too.
